Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1-4 and 11-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Uhl in view of Stafford.

The limitations of claims 1-4, and new claims 11-15, are met by or obvious over Uhl for the reasons discussed in the previous office action. Regarding the feature concerning the detector receiving selected wavelengths as dispersed by the dispersion element, the language of the claims is seen to only require the detected light having been dispersed at some point in the optical path (which Uhl shows). However, inasmuch as this feature is not explicitly taught by Uhl, dispersed light incident upon a detector is shown by Stafford (note figs. 2-4 and columns 1 and 2). It would have been obvious to use this arrangement of Stafford in Uhl's device in order to enable detection of multiple wavelengths at one time.

Regarding claim 12, although not explicitly taught by Uhl, adjustable apertures formed from switchable mirrors are well known in the art and an example is shown by Stafford. It would have been obvious to include such in the device of Uhl in order

Art Unit: 2872

to enable the aperture to be adjusted depending upon the various wavelength being used for illumination.

Response to Arguments

3. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yokoi shows a microscope including switchable micro-elements.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened

Art Unit: 2872

statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
